

CareFusion Announces New Clipvac® System for its Surgical Clippers

Designed Exclusively for CareFusion by Surgical Site Solutions, Inc.

SAN DIEGO, CA, April 1, 2014 – CareFusion (NYSE:CFN), a leading global medical technology company, today announced availability of the *ClipVac*® hair removal system from Surgical Site Solutions, Inc., designed exclusively for a new innovative clipper handle from CareFusion.

The *ClipVac* system connects to CareFusion's new surgical clippers and is designed to improve the current hair removal practice by using vacuum technology to capture hair clippings as the hair is cut at the source. The *ClipVac* system saves time by capturing an average of 98.5 percent of the hair and airborne contaminants at the source, reducing the need for a secondary process of clean up. Test data supports vacuum technology as a safe, highly effective and efficient alternative when hair removal is carried out in the surgical or ancillary setting.

"This exclusive *ClipVac* system design from Surgical Site Solutions continues to differentiate our surgical clippers in the industry," said Jan Creidenberg, vice president and general manager of Infection Prevention at CareFusion. "The combination of our innovative new clippers and the *ClipVac* system promotes best practices for hair removal prior to surgery."

CareFusion launched the next generation of the company's industry-leading line of surgical clippers in 2013. The new clippers, developed in conjunction with clinicians who use these types of devices every day, are designed to dramatically improve ergonomic feel and performance and encourage proper hand position and application. The new clippers can also be used in wet or dry conditions. The refined, balanced design naturally promotes proper blade angles and the correct use of the clippers, which limits skin irritation for the patient as compared to traditional razors.

CareFusion Surgical Clippers and the *ClipVac* system will be on display in CareFusion booth 2019 and Surgical Site Solutions booth 1555 of the Association of periOperative Registered Nurses (AORN) Surgical Conference & Expo being held March 30 – April 2 at the McCormick Place in Chicago.

About BD

BD is one of the largest global medical technology companies in the world and is advancing the world of health by improving medical discovery, diagnostics and the delivery of care. The company supports the heroes on the frontlines of health care by developing innovative technology, services and solutions that help advance both clinical therapy for patients and clinical process for health care providers. BD and its 65,000 employees have a passion and commitment to help enhance the safety and efficiency of clinicians' care delivery process, enable laboratory scientists to accurately detect disease and advance researchers' capabilities to develop the next generation of diagnostics and therapeutics. BD has a presence in virtually every country and partners with organizations around the world to address some of the most challenging global health issues. By working in close collaboration with customers, BD can help enhance outcomes, lower costs, increase efficiencies, improve safety and expand access to health care.
