The tables below set forth the Total Consideration for each series of Securities.

- (1) Per \$1,000 principal amount.
- (2) The Total Consideration for Securities validly tendered prior to or at the Early Tender Date (as defined below) and accepted for purchase is calculated using the applicable Fixed Spread and is inclusive of the Early Tender Payment.

The "Total Consideration" listed in the tables above for each \$1,000 principal amount of a series of Securities was determined at 9:00 a.m., New York City time, on June 4, 2019. Only holders of Securities who validly tendered and did not validly withdraw their Securities at or prior to 5:00 p.m., New York City time, on June 3, 2019 (the "Early Tender Date") are eligible to receive the Total Consideration for Securities accepted for purchase. Holders of Securities who validly tender their Securities after the Early Tender Date but prior to or at the Expiration Date (as defined below) will be eligible to receive the "Late Tender Offer Consideration", which is equal to the Total Consideration minus the Early Tender Payment specified in the tables above. Holders will also receive accrued and unpaid interest on Securities validly tendered and accepted for purchase from the last interest payment date up to, but not including, the date the Company makes payment for such Securities. Since the tender offers are fully subscribed as of the Early Tender Date, the Company does not expect it will accept any Securities tendered after the Early Tender Date.

Because the aggregate principal amount of 4.875% Notes due 2044, 4.685% Notes due 2044 and 3.700% Notes due 2027 tendered and not validly withdrawn would exceed the applicable Tender SubCap (as increased, if applicable), the Company will not accept for purchase all such Securities that have been tendered. Rather, the Company will accept Securities of each applicable series for purchase on a prorated basis. The Company will use a proration rate of approximately 49.92% for the 4.875% Notes due 2044, approximately 21.84% for the 4.685% Notes due 2044 and approximately 34.80% for the 3.700% Notes due 2027. Such Securities tendered by a holder will be multiplied by the applicable proration rate and then rounded down to the nearest \$1,000 increment. The Company will accept all of the 5.000% Notes due 2040 validly tendered and not validly withdrawn as of the Early Tender Date. The Company will not purchase any of the tendered 3.734% Notes due 2024, 4.669% Notes due 2047 or 2.894% Notes due 2022.
